

## University of Pannonia

The University of Pannonia, with its seat in Veszprém, is operating on six separate campuses in the Transdanubian region, the former Roman province known as Pannonia. The five faculties and six outstanding doctoral schools of the university offer a wide scale of high quality educational programs supported by cutting edge research activity and student friendly environment.

The Georgikon Faculty (Est. 1797) was the first institution of agricultural higher education in Europe. Besides the traditional agricultural sciences, a great emphasis is laid on modern ecological considerations. The Faculty of Engineering (Est. 1949) offers graduate and research programs in all traditional fields of engineering including chemical engineering, mechanical engineering, environmental engineering, materials engineering. The bachelor's and master's programs of the Faculty of Modern Philology and Social Sciences (Est. 1990) cover the fields of education, social sciences and language studies. The Faculty of Information Technology (Est. 2003) offers study programs in IT and advanced technologies: business information technology, engineering information technology, software information technology, electrical engineering, logistics engineering. The Faculty of Business and Economics (Est. 2003) offers nearly 20 bachelor's and master's programs in three fields: business economics, economics and technical management. The Faculty is recognised as a constantly growing and important intellectual centre in the Transdanubia region and contributes to the functioning and improvement of the public and civil society with its high quality education, research and development activities.

In order to meet the needs of the labor market, our activities are carried out in close cooperation with the regional industrial partners and local governments. Based on the professional achievements of our faculty staff and the internationally recognized R&D results, the University of Pannonia is ranked among the best Hungarian universities. The degree obtained at our University is an acknowledged, valuable certificate providing a solid basis for successful career perspectives. To improve cultural experiences, our campuses maintain decades and century long traditions of student life.
